

POSANI PANDARI

Telangana, India | +91-8688792747 | posanipandari7@gmail.com

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineer with a B.Tech in Computer Science and Engineering. Strong foundation in Python, Data Structures & Algorithms, Object-Oriented Programming, SQL, REST API development, and software engineering principles. Experienced in designing, developing, testing, and debugging full-stack and backend applications, including RESTful APIs with FastAPI and PostgreSQL. Skilled in data analysis and visualization using Pandas, NumPy, and Matplotlib. Passionate about writing clean, efficient, maintainable code and continuously learning new technologies.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, HTML, CSS
- Backend & API Development: FastAPI, REST API Design, SQLAlchemy (ORM), Swagger UI, CRUD Operations
- Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering
- Frameworks & Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
- Databases: PostgreSQL, MySQL
- Tools & Version Control: VS Code, Jupyter Notebook, Git, GitHub, Microsoft Excel
- Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management, Adaptability, Quick Learner

EDUCATION

Malla Reddy College of Engineering (MRCE)

2021 – 2025

Bachelor of Technology (B.Tech) – Computer Science & Engineering

PROJECTS

Employee Management System (EMS) – REST API

Technologies: Python, FastAPI, SQLAlchemy, PostgreSQL, REST API, Swagger UI, Git, GitHub

- Developed a full-featured Employee Management System REST API using Python, FastAPI, SQLAlchemy, and PostgreSQL.
- Implemented complete CRUD operations to create, retrieve, update, delete, and search employee records.
- Designed and built RESTful API endpoints following industry best practices for scalability and maintainability.
- Integrated the application with PostgreSQL for robust and efficient database management.
- Tested and documented all API endpoints using Swagger UI, ensuring reliability and ease of integration.
- Managed source code and version control using Git and GitHub.

AI-Based Robbery Behavior Prediction

Technologies: Python, Scikit-learn, Pandas, Matplotlib

- Built a machine learning model to predict robbery behavior using historical crime datasets.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Visualized analytical results using Matplotlib to support data-driven decision-making.

Traffic Sign Detection and Recognition for Autonomous Vehicles

Technologies: Python, Neural Networks

- Developed a traffic sign recognition system for Indian road signs using neural network techniques.
- Improved image classification accuracy through image preprocessing and model optimization.

CERTIFICATIONS

- Python – Cisco
- SQL & Excel – Cisco

ACHIEVEMENTS

- Solved a wide range of Data Structures & Algorithms problems using Python.
- Built and deployed multiple academic and personal software projects, including a REST API-based backend system.
- Strengthened problem-solving and debugging skills through consistent hands-on practice.
